

BIM222- INTERNET PROGRAMMING- HOMEWORK 1

- 1) Create a static city website. Your site should be at least 7 pages. Use only HTML code, DO NOT include any CSS or JavaScript codes to your web site for this homework. The names of the web pages are listed below:

Page 1: home.htm

Page 2: localdishes.htm

Page 3: historicalplaces.htm

Page 4: usefullinks.htm

Page 5: aboutme.htm

Page 6: contactme.htm

Page 7: registration.htm

Page 1 is your home page and should have information about selected city. You are encouraged to name this page “home.htm”. Font size of active page must be bigger than others.

Home	Local Dishes	Historical Places	Useful Links	About me	Contact me	Registration
----------------------	------------------------------	-----------------------------------	------------------------------	--------------------------	----------------------------	------------------------------

Welcome to Eskisehir. Eskisehir is a province of Turkey

Page 2 contains local dishes of the selected city. You are encouraged to name this page “localdishes.htm”. (Maybe some photos, videos, and information on some famous restaurants that you can recommend for us to visit on the selected city)

If you want to contact me, please write to the address below:

[Name Surname](#)

Page 7 is registration form. It should have

- Name
- Surname
- Date of Birth
- E-mail

- Password (Password characters should not appear)
- Gender (from drop-down list)
- Interest checkboxes (somethings really interesting :))
- Submit button (sure to submit the form) → When the form is submitted, the page should *thanks* for registration
- Reset button → When user clicks reset button, registration form must be reset.

☐ etc.

What to submit? Where to submit?

- Your web sites need to be **both**
 - Publish on the Internet
 - You may use GitHub io pages
(use your GitHub accounts, <https://pages.github.com/>)
 - (If you have) You may use your own domains
 - Submit through department websit
(ceng.anadolu.edu.tr – bim222 – assignments)
 - Include all of your codes, photos, etc. which are necessary to see/run your web sites
 - Plus, an “**info.txt**” file which includes the address/link that you published your web site and your enrichments (if any)

Some Important Notes

Note 1: The screenshots above are given as examples to the corresponding web pages. It is necessary to enrich the content of your site as much as possible to get higher grades.

Note 2: Your site should have navigational pane on every page!!

Note 3: This is NOT a group assignment. It should be done individually.

Note 4: Use HTML5 only. Try to use/include some semantic tags also.

Note 5: Use Sublime, Notepad, Notepad++, etc. to write your pages. DO NOT use another program to create these files. These files should be edited as pure HTML, so they should not include extra control codes inserted by other programs, such as Word.

Note 6: You have to submit all your work (codes, photos, i.e., what are necessary to see/run your work) through this web site (ceng.anadolu.edu.tr) within the submission deadlines. ***No homework will be accepted by mail or after the deadlines!! Please do NOT send any work by mail..."***
